

PHILIP NGUYEN

As a data analyst, I have experience supporting public mental health systems through population-level data analysis, reporting, and data system development. I collaborate with program staff and leadership to evaluate state-wide behavioral health programs, maintain high-quality administrative datasets, and communicate findings clearly to technical and non-technical audiences. My technical background consists of R, Python, SQL, and REDCap.

EDUCATION

- 2022
|
2020
- M.S., Complex Systems & Data Science** University of Vermont Burlington, VT
 - Thesis: [Predicting mental health and substance use in adulthood from resilience in adolescence](#)
 - Other projects: [ABCD Study Brain Analysis Tool](#); [Network Analysis of Mental Health Symptoms in ABCD Study Youth](#); [Archetypometrics, a Pragmateia: Empirical Determination of the Fundamental Archetypes of Fictional Characters](#)
 - Relevant coursework: Principles of Complex Systems, Bayesian Statistics, Data Science I & II
- 2015
|
2013
- B.A., Psychology** University of Vermont Burlington, VT
 - Relevant coursework: Statistical Methods in Psychology, Cognitive Development, Psychopathology

SELECTED INDUSTRY EXPERIENCE

- Present
|
2023
- Senior Research Analyst** Oregon Health & Science University Remote
 - Support statewide mobile crisis intervention and stabilization services through analysis of large administrative mental health datasets.
 - Collect, clean, validate, and prepare data for quarterly and annual program performance reporting (30,000+ records).
 - Develop, document, and maintain reproducible data pipelines using R, Python, and REDCap, including data dictionaries, business rules, and quality checks.
 - Monitor data quality, identify inconsistencies, and collaborate with program and IT staff to resolve data issues.
 - Produce data summaries, trend analyses, and visualizations to support operational decision-making and program improvement.
 - Respond to ad hoc data requests from internal stakeholders, translating analytic results into actionable insights.
 - Provide guidance on statistical methods, interpretation of findings, and limitations of analyses for non-technical audiences.
 - Contribute to continuous improvement of data systems and reporting processes with an emphasis on equity and access in mental health services.
- 2022
|
2018
- Research Project Assistant** University of Vermont Burlington, VT
 - Processed, cleaned, and analyzed large, multi-site longitudinal datasets using R.
 - Conducted exploratory and inferential analyses and prepared visualizations for internal reports, academic manuscripts, and conference presentations.
 - Developed R Shiny applications to support data access, wrangling, and documentation for research teams ([ABCD Data Dictionary](#), [ABCD Data Wrangler](#)).
 - Created training materials and taught R to undergraduate and graduate students.
 - Managed and trained part-time staff; coordinated workflows across multiple projects.

LANGUAGE SKILLS

2017
|
2016

Americorps Corps Member City Year New Hampshire  Manchester, NH

- Supported students through tutoring, mentoring, and socio-emotional skill development.
- Planned and facilitated small-group instructional sessions and school-wide initiatives.
- Led after-school robotics programming and incorporated mindfulness practices with students.

2016
|
2015

Utilization Review Coordinator Recovery Road Medical Center  Santa Barbara, CA

- Reviewed patient treatment progress with interdisciplinary clinical teams to determine continued length of stay.
- Coordinated with insurance providers and case managers, advocating for patients within behavioral health care systems.
- Gained hands-on experience with mental health service delivery and administrative healthcare processes.

WRITING AND PUBLICATIONS

2025

The Central Limit Theorem philintheblank.substack.com

- A technical exploration of the Central Limit Theorem and how it fits into the rest of statistics

2022

Prenatal Cannabis Exposure Predicts Attention Problems, without changes on fMRI in Adolescents

- Performed literature review, created tables and plots.
- Leigh-Anne Cioffredi, MD; Hillary Anderson, MD; Hannah Loso, PhD; James East, MD, PhD; Philip Nguyen, MS; Hugh Garavan, PhD; Alexandra Potter, PhD

2021

Multimodal brain predictors of current weight and weight gain in children enrolled in the ABCD Study

- Performed literature review, created tables and plots, ran simple statistical tests.
- Shana Adise, PhD; Nicholas Allgaier, PhD; Jennifer Laurent, PhD; Sage Hahn, BS; Bader Chaarani, PhD; Max Owens, PhD; DeKang Yuan, BS; Philip Nguyen, BA; Scott Mackey, PhD; Alexandra Potter, PhD; Hugh Garavan, PhD

2021

Cerebellar activation related to working memory in children born premature: an fMRI study (pending publication)

- Performed primary analyses (case matching, t-tests, ANOVA), on cognitive measures
- James East, MD, PhD; Bader Chaarani, PhD; Philip Nguyen, MS; Hugh Garavan, PhD; Alexandra Potter, PhD; Bruno Soares, PhD
